Quality Color Snow Guards

The Avi Anchor™ snow guards offer beautiful semi-transparent colors to pick up the color of the roof. These snow guards are designed to be architecturally pleasing to the eye as well as strong.

The Avi Anchor™ Snow Guard is the industries strongest snow stop. These have been designed with two large structural ribs for increased sheer strength and holding capability.

The Avi Anchor™ snow guard will last at least as long as your roof will last. It is made from strong Polycarbonate material mixed with a UV inhibitor as well as a UV inhibitor mixed into the color pigment to the Avi Anchor™ product superior durability as well as superior protection against color fade.

Why we are the better choice

- Stronger
- Longer Life - UV Protected
- Transparent Colors to pick up color of roof
- More Secure attachment to roof
- Attractive
- 20 year warranty
- Won't fade
- Not Glued to the roof
- More Appealing design
- Low Cost
- Easy to Install
- Great customer service
- Engineered by a roofing contractor

Easy Installation

Our snow guards can be attached year round. There is no glue, no setup or curing time. These can be mounted at odd angles and in odd places, unlike competitive products. You also do not

need to worry about color matching since our snow guards are semi transparent and can pick up the color of your roof. We also have clear snow guards for roofs that are of a unique color.

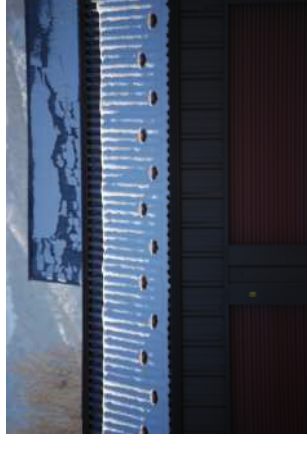

Pricing

We sell our snow guards direct through online retailers and through dealers (check our site for current dealers) Please call for wholesale pricing.

Bulk pricing available at steep discounts. Color coordinated screws also available.

Background

The Avi Anchor™ snow stop we designed by a 30 year veteran roofing contractor in the high country of Colorado. He used all the other snow guards available and experienced the failures and difficult installation. Unable to find what his customers deserved, he designed and perfected the Avi Anchor™ Snow Stop.
